Shows progress of current actions, i.e. downloading, uploading and converting to movies

Workspace

Your workspace for downloading, previewing, or editing videos

Three viewing modes:

1.**List view** – displays scrollable list with small thumbnails

2.**Thumbnail view** - allows you to preview in place or open for viewing in Single view

3.**Single view** - mode in which you watch your video in the largest size in the Workspace

Action Bar

1. Save to camcorder/computer - depending on your selection from Navigation Pane
2. Play full screen - allows you to view highlighted video full screen.
3. Email - share your video to a friend via email
4. Flip Channel - share videos with others online
5. Greeting card - share videos with others in an online greeting card
6. Online - share videos online with other services
7. Movie - use to create movie from one or more video clips
8. Snapshot - use to select a single frame as an image from a video

FlipShare Editing

Trim a Video

Trimming a video creates a new start and stop point, it does not actually eliminate any of your video.

1. Highlight video in Thumbnail or Single view mode
2. From top menu bar, click Edit, then select Trim or click the scissors under the picture in the preview window
3. Drag the left Trim Tool to where you want video to begin
4. Drag the right Trim Tool to where you want the video to end
5. Click Save as to name and save your trimmed video.

* You can only trim videos, not movies

This handout modified with permission from the original handout by Sandra Somera, Coordinator, Instructional Technology, SMCOE

6

Creating Snapshot

Snapshots allows you to capture individual frames from your videos

1. Select a video from your Workspace
2. Select Snapshot from the Action Bar
3. As you rest your cursor over a Thumbnail, the image appears in the preview window
4. To select a Snapshot
   o Click Take Snapshot from under preview window or
   o Drag the Thumbnail to the right panel
5. Click Save when you have all your Snapshots from the selected video
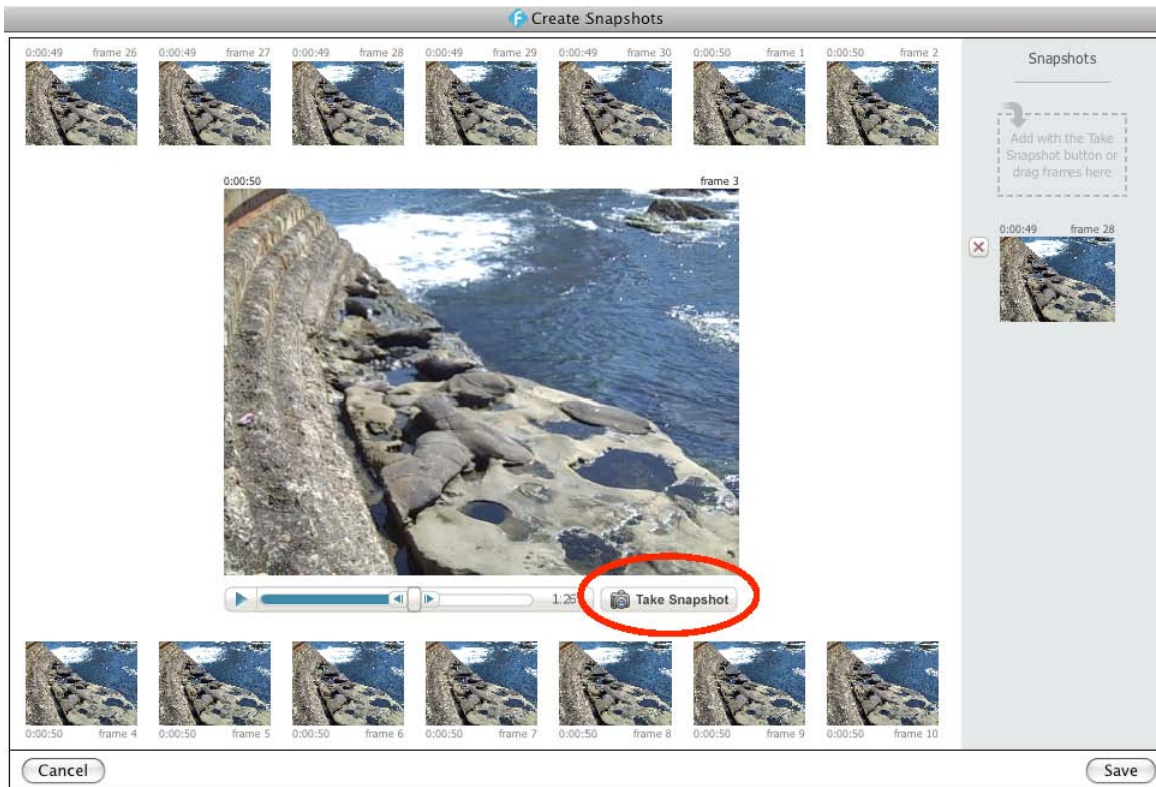

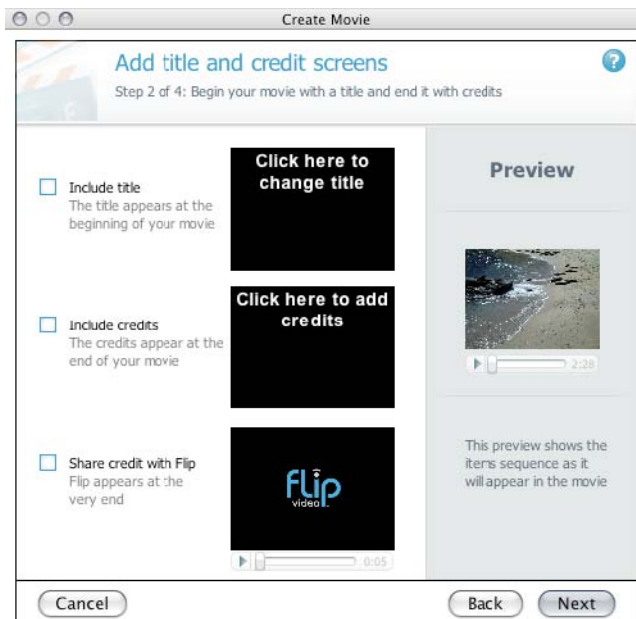

Creating Movie

To create a Movie from several video clips and snapshots:

1. From your Navigation Pane select a folder
2. From the Workspace select videos and snapshots that you want to create a movie from
   ◦ on a Mac hold down the Command key to select several videos
3. From the Action Bar, click Movie
4. Create Movie wizard will appear
5. You can add more videos from other folder and drag and drop them into the Create Movie window
6. You can also rearrange the order of the videos by clicking and dragging
7. Then click Next
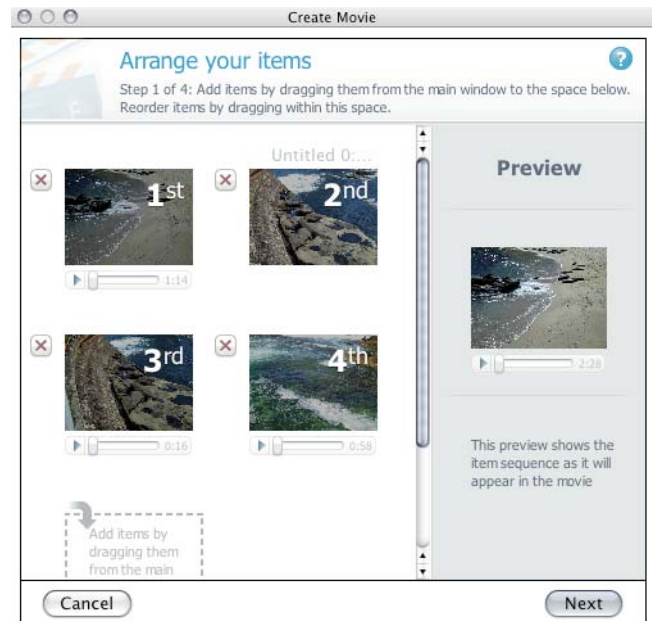

Creating Movie - Title

1. In your video you may include a Title, Credits and Share credit with Flip.

2. Click the option(s) you want to include and type your text

3. Then click Next
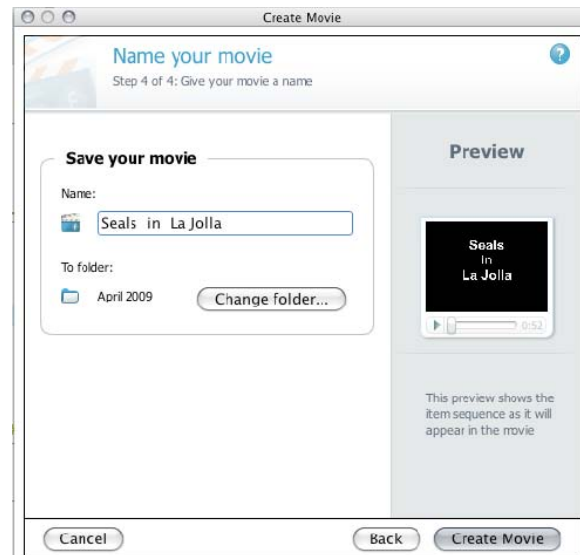

Creating Movie - Audio

1. Choose your music file from:
   - o no music
   - o Flip Video music
   - o mp3 file on your computer

2. Select how you want the music to play
3. Click Next

Creating Movie - Finish

Save your movie and click Create Movie

This may take a few minutes, depending on the length of your movie

Check the Progress Bar at the bottom of the Navigation Pane to see when your movie is completed.
